Catalyst Therapy, Inc. (CTI) is primarily an occupational therapy clinic in Encinitas, CA that specializes in sensory integration evaluation and treatment, with an emphasis on the pediatric population. We treat children who have been identified with special needs and disabilities as well as those who may not have yet been formally identified but are looking to maximize the potential of their children and/or themselves. CTI provides an innovative, eclectic, and holistic approach to therapy. By forming a partnership with our clients, we aim to spark the energy and commitment within the individual and/or family that is imperative to enact lasting change. Our goal is to facilitate a child's full potential.
